Fulton County Bus Shelter Status Report

Through Fiscal Year 2021

About The Bus Stop Amenities Program

MARTA is working to bring 1,000 new bus stop amenities to our system and the communities we serve. Adding seats and weather protection amenities like shelters and benches will increase passenger comfort and could potentially increase ridership levels and rider retention. New amenities are symbols of MARTA's investment in the communities, and our commitment to collaborating with our local government partners.

By the end of the fifth year, at least 472 (32%) of Fulton County bus stops will have amenities. Additional amenities are also being INSTALLED within the City of Atlanta and are not counted here.

Bus Stop Amenity Process

Throughout this document, you will see icons to indicate status for each amenity. Installing a bus stop amenity is a 5-step process, detailed in the graphic below. All of Fulton County's 58 bus shelters are in the survey and DESIGN step or beyond.

1. Site Selection – sites are selected based on several factors, including ridership, nearby land use, local input, and physical site conditions. See the preceding page for details on site selection.
2. Problem Solving – some sites present problems with unusual physical constraints, private property issues, or other coordination issues that must be solved BEFORE survey and DESIGN can begin.
3. Survey & DESIGN – the site is surveyed and a site plan is developed for PERMITTING and construction.
4. PERMITTING – MARTA must go through permit processes with GDOT, local governments, and sometimes both.
5. Construct Amenity – Once permits are obtained, MARTA begins construction. New bus shelters are INSTALLED on new concrete pads or existing sidewalks.

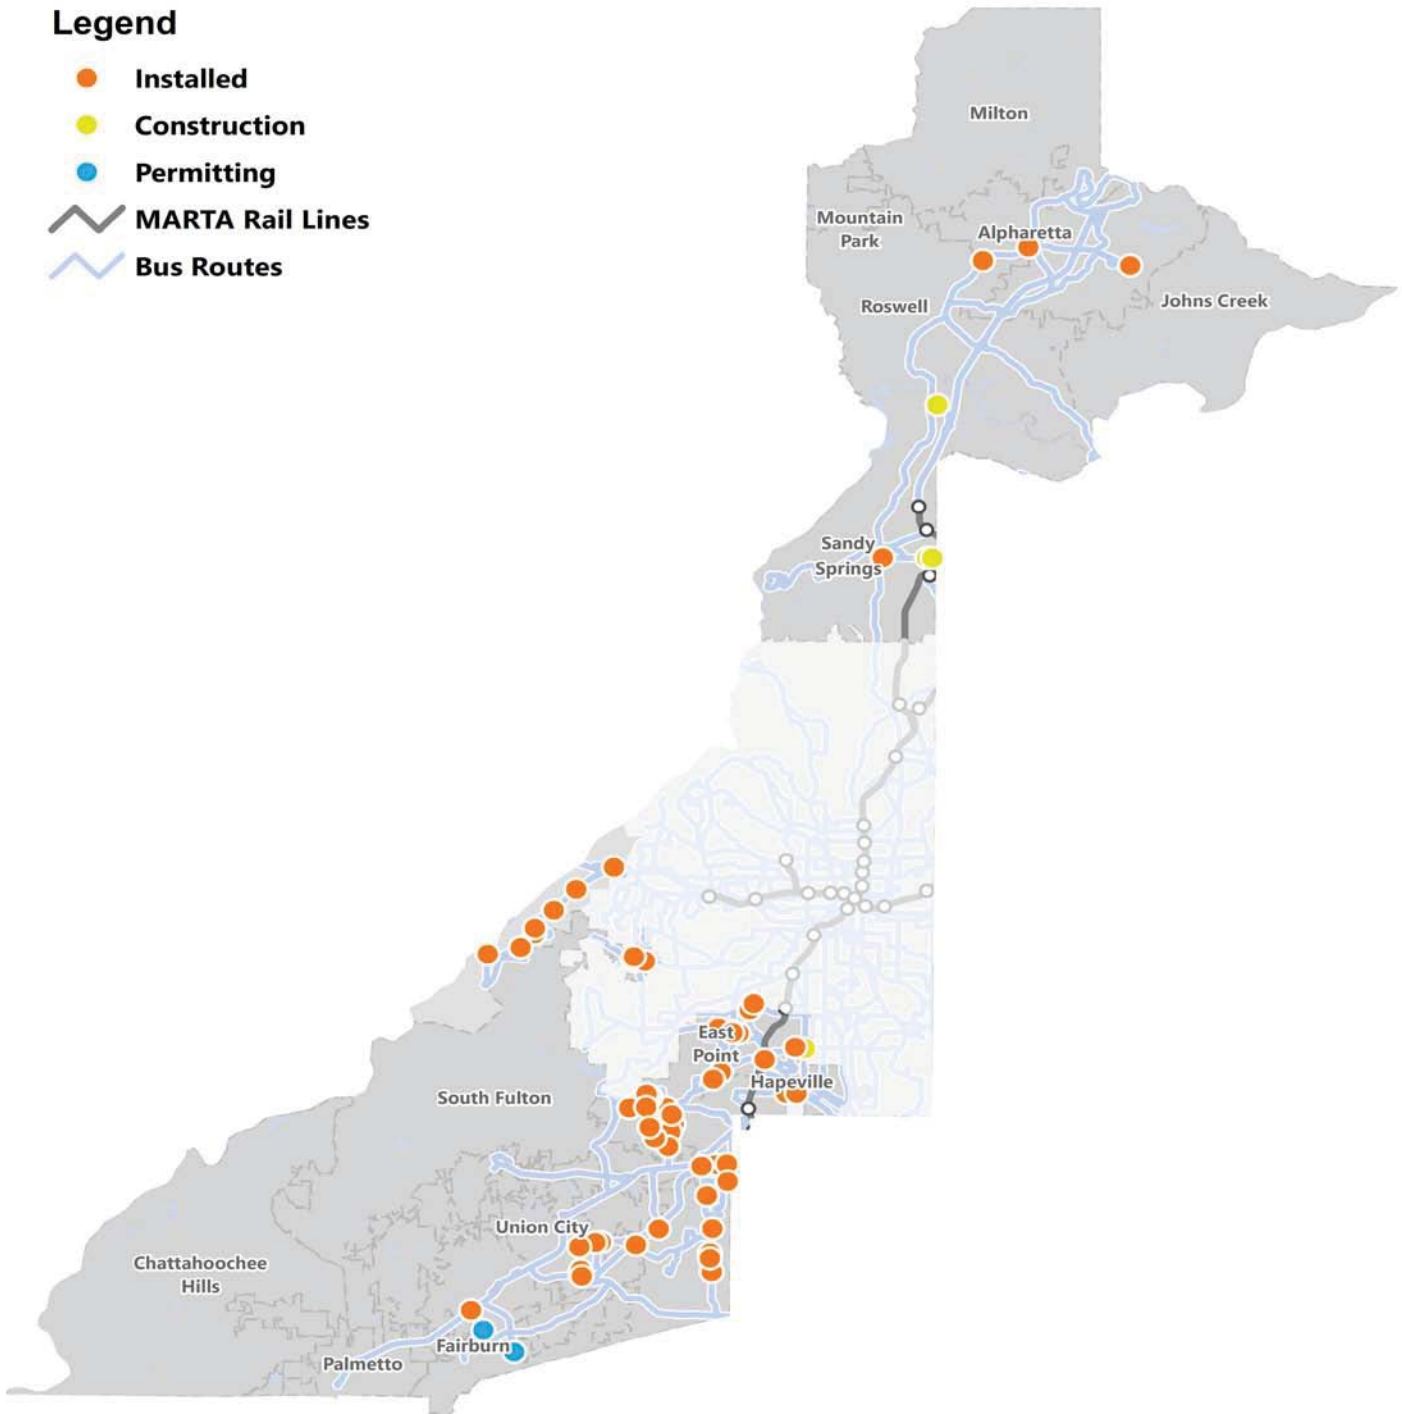

Bus Shelter Locations
