Summary & Background *(First sentence includes Agency recommendation. Provide an executive summary of the action that gives an overview of the relevant details for the item.)*

Scope of Work: This contract will continue to allow the Department of Public Works to purchase the necessary supplies and materials for filling voids between the new manhole inserts and the existing manholes as part of the Inflow and Infiltration reduction program. The two-component, low exotherm, polyurethane foam is used to fill the voids created between the inserts and existing manholes to prevent ground water from entering the sanitary sewer system. This material allows for significant reduction in the time and cost it takes to rehabilitate existing manholes.

Community Impact: One of the leading causes of sanitary spills is the introduction of inflow and infiltration of storm water and ground water into the sanitary system. By better sealing existing manholes with the inserts and this polyurethane foam, storm water and ground water cannot enter the sanitary system which will lead to a reduction in the number of sanitary sewer overflows and spills.

Department Recommendation: The Department requests approval to renew the existing contract to Prime Resins, Inc.

Project Implications: EPD requires the County to reduce the number of sanitary sewer spills caused by inflow and infiltration. The use of this product will reduce the time to rehabilitate a manhole from days to hours.

Community Issues/Concerns: None have been raised by the community concerning this contract renewal.

Department Issues/Concerns: The Department of Public Works does not have any issues or concerns with this contract renewal.

Contract Modification:
