Is this a purchasing item?
Yes

Summary & Background: A single bid analysis was conducted and The Department of Purchasing and Contract Compliance determined it is in the County's best interest to proceed with an award.

The Department of Public Works recommends approval of lowest responsible bidder to American Flow Service, LLC with two renewal options.

Scope of Work: This contract will provide all required maintenance and repairs on publicly owned fire hydrants within the Fulton County managed water system throughout the North Fulton service area within the cities of Alpharetta, Johns Creek, Milton, Mountain Park, and Roswell. Public Works staff will direct the contractor on an on-call basis. The ITB contained cost proposals for a wide variety of services that could possibly be required for fire hydrants maintenance and repairs. It is very unlikely that Fulton County would ever require every single item in the ITB to be implemented in a calendar year. Therefore, Public Works does not recommend that the full ITB cost proposal be awarded. Rather, Public Works is recommending that the contract be limited to \$200,000.00 at this time and represents the typical value of maintenance activities this contract has expended in the past. If the level of fire hydrant maintenance exceeds \$200,000.00 in 2023, Public Works will request an increase in spending authority to cover the additional expenses.

Community Impact: Fire Hydrants need to be maintained to ensure that they are properly functioning and operating for use by the various Fire Departments in extinguishing fires when called upon during emergencies.

Department Recommendation: The Department of Public Works recommends approval of lowest

responsible bidder to American Flow Service, LLC with two renewal options

Project Implications: There are four (4) city Fire Departments, Milton, Alpharetta, Roswell and Johns Creek within the North Fulton Water System. Each city Fire Department reports specific fire hydrant problems to Fulton County when discovered. The fire hydrant maintenance and repair contract allow Fulton County to correct these problems in a timely manner. Properly maintaining the water system distribution system ensures fire extinguishing capabilities and provides customer safety and confidence of the water system.

Community Issues/Concerns: None that are known by the Public Works Department.

Department Issues/Concerns: The Department of Public Works has no issues or concerns with this agenda item.

Contract Modification: NEW PROCUREMENT
