Summary & Background

The Department of Juvenile Court recommends the approval of a contract with Evidence-Based Associates, LLC. The mission of Fulton County Juvenile Court is: first, to protect children and the community in matters brought before the court, to rehabilitate children, and to restore families; and second, to create opportunities for the community, partners, and stakeholders to engage in this mission actively. Fulton County Juvenile Court has been awarded funding from the Criminal Justice Coordinating Council. One of the objectives of this initiative is to provide evidence-based therapeutic services to court-involved children who are identified as moderate or high risk to re-offend, as determined by the utilization of objective risk and needs screening instruments. Four (4) treatment programs are identified to assist with meeting this objective; Trauma-Focused Cognitive Behavioral Therapy (TF-CBT), Functional Family Therapy (FFT), Multi-Systemic Therapy (MST), and Aggression Replacement Training (ART). Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) is effective in addressing court-involved children's varying levels of exposure to traumatic experiences. Functional Family Therapy (FFT) is effective in addressing the behaviors of at-risk children and delinquent youth to overcome adolescent behavior problems, conduct disorder, substance abuse, and delinquency. Multi-Systemic Therapy (MST) is an intensive family and community-based treatment service that addresses multiple aspects of severe anti-social behavior in adolescents. The program's multi-systemic approach views an individual's behavior as being influenced by the systems around them and the individual's thoughts and feelings about those systems. Aggression Replacement Training (ART) concentrates on developing individual competencies to address various emotional and social aspects contributing to youths' aggressive behavior. Program techniques are designed to teach youths how to control angry impulses and take perspectives other than their own. The main goal is to reduce aggression and violence among youths by providing them opportunities to learn pro-social skills instead of aggressive behavior.

Scope of Work: The Fulton County Juvenile Court (FCJC) seeks to further its mission to rehabilitate children and restore families through the continued provision of evidence based therapeutic treatment and intensive in-home family-based services to children who meet prescribed eligibility criteria and who otherwise would potentially be committed to placements outside of their home environment. These support services include family/group reintegration and prevention services, as well as psychological evaluations; ART-Aggressive Replacement Therapy, Trauma Focused Cognitive Behavioral Therapy (TF-CBT), Functional Family Therapy (FFT) and Multi-Systemic Therapy (MST), an intensive family and community based treatment program that addresses the environmental systems that impact chronic and violent juvenile offenders, including their homes and families; schools and teachers; and neighbors and friends.

Community Impact: Children and families impacted in an effective manner that leads to the successful completion of court ordered supervision conditions; and the reduction of juvenile delinquency re-offense rates by providing high quality and high-fidelity evidence-based service delivery for children and families

Department Recommendation: The Juvenile Court recommends approving new contracts with Evidence-Based Associates, LLC for implementing FFT, ART, TF-CBT, and MST evidence-based services to court-involved children and families.

Project Implications: No future implications exist.

Community Issues/Concerns: No issues have raised.

Department Issues/Concerns: The Department does not have concerns.
